"As one of the youngest Members of Congress, I want to do everything possible to hear the views of young adults and make sure your thoughts and suggestions are heard in Washington, DC.

"In this first E-Town Hall I am convening for young adults aged 16-30, the main subject will be ideas to reform the Social Security system. Any changes Congress and President Bush make to Social Security will affect your paycheck now, your parents' retirement in just a few years, and your own retirement security in the long-term. You can talk about other subjects in our E-Town Hall too."
